

Instructions

You need to create 10 box containing a RANDOM number (between 1 and 100

- The RANDOM number is NOT VISIBLE until you CLICK on the BOX

Guest where is Even number box

CLICK

When clicking on any box : the number is DIPLAYED

- If the number is EVEN : display WON + green background

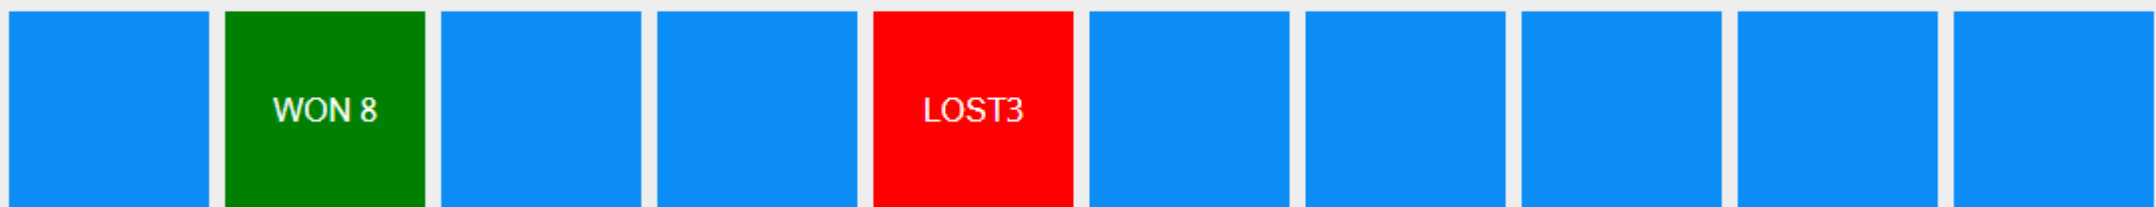

Guest where is Even number box

CLICK

- If the number is ODD : display LOST + RED background

Guest where is Even number box

Start code explanation

Note : you can also do as you want ,,,

```
let container = document.querySelector(".container");

// 1- Create the 10 boxes on the container DIV
// For each box:
// 1-1 Create a span and set it with a random number between 1 and 10
// Example :    <span>49</span>

// 1-2- Create a box div to wrap the span
// The div must have:
//     - class = "box"
//     - id = box<index>    (index of thebox, 0 to 9)
// Example :    <div class="box" id="box5"><span>49</span></div>

// 1-3 Add a listener when clicking on the box
// 1-4 Add the box to the container

// This function is called when any box is clicke
function onBoxClick(event) {
    // 1- Get the box related to the click event
    // 2- Get the span (the children of the box) and get the number
    // 3- If even is EVEN, set the box to green and spam text to WON and the number
    // 4- If even is ODD, set the box to red and spam text to LOST and the number
    // 5- Also change the opacity of the span to make it visible
}
```
