

# MANAGE EDIT

1- FRONT END : ADD A BUTTON EDIT – ON HOVER

When mouse over  
Add a button to edit the  
message

# MANAGE EDIT

2- FRONT END : ADD THE ID of each message to the DOM (hidden property)

3 – ON CLICK ON BUTTON :

- GET THE ID (from hidden property)
- Display the current post in the INPUT
- Keep the information that we are currently EDITING  
You can just keep the ID

4 – WHEN CLIKC ON POST BUTTON

- IF EDITING IS TRUE
  - Send a PUT request instead of a POST request
  - Send the ID + the next TEXT

5 – SERVER SIDE

- Mange the PUT request:
  - Get the User from the ID
  - Update the User text
